

mounting the totem on the base

<https://www.youtube.com/watch?v=8pyHzPxYr5E>

Secure the totem to the base with the leather straps.

The position of the totem in relation to the whistle input influences the sound quality and tuning.

The air outlet chimney (tunnel) below the block/totem must be directed towards the whistle hole

Note a pencil mark on the base, which demonstrates the ideal distance for positioning the totem in relation to the whistle hole.

When you're finished playing the flute, you can remove the totem to make it easier to clean and dry the base.
